PROGRAM

Building Capacity (Isti d d)

Great quantities of academic content are covered in this program, but the crucial component is to equip each student with the tools required to research, process, and retain knowledge. This may also be expressed as   capacity (   ) for knowledge   When a student acquires these tools and develops a certain level of capacity and proficiency in them, their knowledgeols

cycle that they will be able to achieve the required academic outcomes.

The general
